

A REAL EYE-CATCHER

VISLINE

 **PLANAM**
Fashion for your profession

NOT A TRACE OF A SCRATCH

In everyday work, it is better to be safe than sorry, for example, when handling vehicles in workshops. A moment's lack of attention and the zip on the jacket leaves a scratch in the paintwork. Smart workwear prevents this and is, therefore, the best insurance policy. Our "policy": Visline, the range that leaves no trace.

Scratch-free is the top priority of the Visline collection. Intelligent details on our garments ensure that this is adhered to always. These include concealed press studs, covered zips and pockets with flaps. The clever tailoring helps avoid contact between metallic garment elements and workpieces of all kinds. No contact, no scratches.

Scratch-free surface

Flaps conceal metallic garment details such as press studs and zips, so that no scratches can occur on contact with other surfaces.

Inside button

In addition, inside buttons on the waistband help keep the trousers scratch-free.

CRAZY CONTRASTS

Visline is a real eye-catcher in the PLANAM range. Four colour options offer choices to suit everyone's taste, and the subtly eye-catching design is timeless.

The motto of the Visline look: "Opposites attract." Contrasts characterise the modern look of the collection – from the colour-contrasting piping to the appliqué. This range skilfully catches the eye and also has the necessary functional suitability for use in everyday working life.

Triple cut seam
ensures robustness at stress points

Diagonal stripes in contrasting colours
For a sporty appearance

Scratch-free surface
Through concealed button plackets, you have concealed zips and flaps on all pockets

Unique look, numerous features – Visline combines design and function in one collection.

Visline is a storage miracle. This is ensured by numerous practical features that pay off in everyday working life – from cargo and thigh pockets for maximum storage space, to knee pockets for padding inserts and a flexible elastic waistband for maximum wearing comfort. No wish is left unfulfilled here.

In addition, **inside buttons** on the waistband help keep the trousers scratch-free.

Thigh pocket
Plenty of storage space and scratch-free surface thanks to the flap

Cool cargo pocket
Everything is always well-stored and ready to hand

Knee pockets
Trousers and dungarees can be fitted with PLANAM knee pads

Practical mobile phone pocket
Flap avoids the accumulation of impurities

STANDARDS & CERTIFICATION

DIN EN 14404 KNEE PROTECTION FOR WORKERS KNEELING DOWN

Working in a kneeling position creates constant pressure on the knee. Knee protection is designed to distribute the forces produced evenly across it. In addition to this, it is designed to prevent injuries or damage caused by hard surfaces, small stones or similar objects lying on the ground.

Knee protection is subdivided into 4 types:

- Type 1: Knee protection that is separate from clothing and fastened to the leg.
- Type 2: Pads inserted into pockets on trouser legs or permanently attached to the trousers.
- Type 3: Equipment that is not attached to the body.
- Type 4: Knee protection forming part of a unit with additional functions.

In addition to this, there are three performance classifications:

- Level 0: No protection against punctures.
- Level 1: The knee protection is suitable for even ground where there is no risk of objects over 1 cm in height.
- Level 2: The knee protection is for use in challenging conditions, such as for example when kneeling on stones in mines or quarries.

The PLANAM knee pad product no. 9901027 is certified as Type 2, Level 1/ Level 0 knee protection. This certification only applies in conjunction with PLANAM trousers, dungarees or overalls and cannot be transferred to other products.

THE OEKO-TEX® STANDARD 100

The OEKO-TEX® Standard 100 is an independent testing and certification system for raw, intermediate and end products for textiles from all stages of processing. Examples of certifiable articles are raw and dyed/refined yarns, raw and dyed/refined woven and knitted fabrics, ready-made articles (garments of all types, home textiles, bedding, terry towelling, toys made of textiles and many others).

Tests for harmful substances cover:

- + substances banned by law
- + substances regulated by law
- + chemicals that are known to be potentially harmful to health (but are not yet regulated by law)
- + healthcare parameters in their entirety, the requirements go well beyond existing national legislation.

Why OEKO-TEX®?

The OEKO-TEX® Standard 100 was developed in the early 1990s as a response to the need of consumers and the general public for textiles that do not pose a risk to health. Negative headlines such as "Poisons in textiles" were widespread at the time, labelling all chemicals used in the production of textiles as negative and harmful to health.

Yet the demands made of modern textile products cannot be met without using certain chemical substances. Fashionable colours, easy care, long life and many other functional properties are demanded of textiles today and are, to some extent, and depending on their intended use (e.g. for professional and protective clothing), quite indispensable.

UV PROTECTIVE CLOTHING WITH INTEGRATED SUN PROTECTION

The largest organ of the human body is the skin, and it is exposed to great danger in summer. UV rays from the sun can increase the risk of skin cancer. Standard textiles are radiolucent, providing insufficient protection.

PLANAM's UV-protective clothing gives guaranteed certified safety. Awarded UV protection certificates "PROTECT 80" and "PROTECT 40", this range guarantees maximum prevention. Just like for sunscreens, the figure indicates the protection factor for spending longer in the sun safely. Our PLANAM models allow the wearer to remain in the sun 80 or 40 times longer than those without protection. With their integrated sun protection factor, the finished garments provide the skin with optimum protection. Those with sensitive skin can stay in the sun longer without having to cover themselves in sunscreen. It is important to know the individual skin type in order to determine the individual's protection time (length of possible exposure to the sun without risk of skin damage). The UV protection factor specified (e. g. Protect 80) gives the factor by which the individual's protection time can be extended just by wearing these textiles.

PERSONALISATION IN NEXT TO NO TIME

Workwear is advertising space for your logo and acts like a business card for your company. Personalisation ensures a recognisable and positive company image. Our finishing service brings your message to a wider audience in a customised, professional and fast manner.

PLANAM Individual specialises in personalising your workwear. From reflective appliqué to transfer prints and embroidery, we offer multiple personalisation options of the highest quality. Whether you need small quantities for handicraft businesses or large runs for industrial companies – our team of experts are on hand to provide you with personal advice and detailed information about the optimal finishing types for our products. This also includes finishing options with methods specifically adapted to the certification requirements of certified protective clothing.
